

Before submitting your work and reviewing your peers, ensure you have completed all the hands-on labs for this project. This Capstone project is worth 100 points and includes 28 tasks across 10 required labs. Your final project will be graded by peers who are also completing this project within the same session. Submit the screenshots and repository URLs for peer reviews in the format specified for each task.

Here is a look at the artifacts you will have to submit for the evaluation of your project:

Prompt	Instruction
1	Submit a link to the GitHub repository that shows visibility set to "public."
2	Submit a link to the markdown (.md) file where the user stories are saved. Ensure that all nine user stories are included in the file.
3	Submit a screenshot named figma-evidence1.png or .jpg that features five Figma application screens: - Login page - Registration page - Home page - Detail page - Favorites/Profile page (with persistence storage)
4	Submit a screenshot named figma-evidence2.png or .jpg that features four Figma application screens: - External API integration - Settings menu - Settings screen - Notifications screen
5	Submit a link to the file in the GitHub repository for the signup implementation. Ensure that it contains the code for the signup functionality.
6	Submit a screenshot named signup_screen_evidence.png or .jpg for the sign-up screen. Ensure the screen includes: - Three fields (username, email, and password) - Sign-up button - Login link
7	Submit a screenshot named signup_error.png or .jpg showing the signup error when a user attempts to register with the learner's app.
8	Submit a link to the file in the GitHub repository for the login implementation. Ensure that the link contains the code for the login functionality of the mobile application.
9	Submit a screenshot named login_screen_evidence.png or .jpg for the login screen. Ensure that the screen contains: - Two fields (email and password) - Sign-up button - Sign up link
10	Submit a screenshot named login_error.png or .jpg showing the login error when a user attempts to log into the mobile app.
11	Submit a link to the file in the GitHub repository for the home screen implementation. Ensure that the link contains the code for the home screen functionality.
12	Submit a screenshot named home-screen-evidence.png or .jpg showing the home screen layout and a logo in the app header.
13	Submit a link to the file in the GitHub repository for the detail screen implementation. Ensure that the link contains the code for the detail screen functionality.
14	Submit a screenshot named evidence-detail-navigation.png or .jpg showing the navigation icon on the main screen.
15	Submit a screenshot named evidence-detail-screen.png or .jpg with the detail screen displaying item information.
16	Submit a link to the file in the GitHub repository for the local storage implementation. Ensure that the link has the code for local storage functionality.
17	Submit a screenshot named evidence-persistence.png or .jpg showing data stored in local storage.
18	Submit a screenshot named evidence-integrateScreen-persistence.png or .jpg showing data stored in the app's front end as well as in local storage.
19	Submit a link to the file in the GitHub repository for API integration. Ensure that the link has the code for the API functionality.
20	Submit a screenshot named evidence-api-ux.png or .jpg showing the app displaying the fetched data from an API.
21	Submit a link to the file in the GitHub repository for the settings menu implementation. Ensure that the link has the code for the settings menu functionality.

	Submit the link and the code for the settings menu functionality.
22	Submit a screenshot named evidence-menu-icon.jpg or .png showing the icon for the settings menu.
23	Submit a screenshot named evidence-menu-items.jpg or .png showing the menu items inside the settings page.
24	Submit a link to the file in the GitHub repository for the settings screen implementation. Ensure that the link has the code for the settings screen functionality.
25	Submit a screenshot named evidence-settings-screen.png or .jpg showing the settings screen.
26	Submit a link to the file in the GitHub repository where the settings menu is implemented.
27	Submit a screenshot named evidence-notification-configure.png or .jpg demonstrating the setup for the notifications.
28	Submit a screenshot named evidence-notification-alert.png or .jpg capturing a successfully triggered test notification.
